

Alejandro González Macías

Graduated in Software Engineering from the University of Seville, I am committed to developing efficient, high-quality software solutions. I have a solid foundation in programming, software design, and problem-solving, built through my academic background and personal projects. I adapt quickly to new environments, enjoy working both collaboratively and independently, and am seeking an opportunity to grow professionally while contributing value to a technology-driven company.

SKILLS

- Teamwork
- Project management
- Problem-solving
- Ability to learn
- Web development
- Programming languages:
Java, JavaScript, TypeScript, Python
- Environments and runtimes:
Node.js
- Frameworks: React, Spring, Django, NestJS
- Git
- Docker

OTHER

- Carné de conducir: B

EDUCATION

Bachelor's Degree in Software Engineering

University of Seville, Seville | 09/2022 – 07/2026

Science Track

IES Francisco Pacheco, Sanlúcar de Bda (Cádiz) | 09/2020 – 06/2022

PROJECTS

UltimateWatch – Social Platform for Movies and TV Shows

Full-stack web application inspired by IMDb, featuring social functionality and real-time synchronization. Developed event management with voting, real-time chat and moderation using WebSockets, as well as advanced audiovisual content exploration and user interaction management.

Technologies: TypeScript, NestJS, React, Socket.IO, PostgreSQL

PetClinic – Veterinary Management Web Application

Collaborative project built on top of a university-provided codebase. Contributed to the design and development of a web platform for veterinary clinic management, including pet registration and tracking, appointment scheduling, adoption workflows, and monetization features.

Technologies: Java, JavaScript, Spring, React, iTop

Charmaway – Cosmetics E-commerce Web Application

Collaborative project focused on developing a web application for managing the sale of cosmetic products and services. Implemented user registration, purchasing, and order tracking features, as well as catalog management for administrators.

Technologies: Python, Django, Microsoft Project

LANGUAGES

Spanish: Native

English: C1 Advanced (Cambridge English)
